

## The Essence of Origin

---

Crete Luxury Art Design - "The Essence of Origin"  
A dot, a dash, a scratch on a blank sheet.

Crete challenges Design by developing and producing pieces that represents where it all begins and where it is born, in which we express our art and passion. Everything we create, everything we design is a reflection of our values. It started with a huge passion, a passion for life, an intense passion for art and for the representation of an element as a form of expression.

The brand was created in 2015 by CEO and founder Narciso Caetano, with several years of experience in design of new parts and producing luxury furniture, and at one point realized that the time had come to realize his dream of creating something new, something differentiating and something unexpected that touched people's souls through the expression of new inspiring lines and shapes.

His total commitment, both spirit and soul, with all their courage and dedication resulted in the creation of a unique brand. Focused on uniqueness, distinction and exclusivity, with an enormous knowledge and experience, arts and techniques combined with a huge desire to reach their limits and overcome them each day and each challenge.

The Crete brand is defined by great moral and cultural values and inspired by the history of mankind. If we could describe Crete in a few words, it would be authenticity, boldness, courage and perseverance.

Since its creation, Crete has stood out for its innovative design trends in the world of luxury furniture, with an unmistakable character and personality. Perfect edges, elegant lines and hand-crafted surfaces in detail exhibit unrivaled design. This purist style of ours is refined by the great passion and detail we dedicate every moment to everything we do.

We create each piece as a unique piece of art, capable of combining the culture and soul of the brand with innovation and the constant search for new looks that transcend the usual and normal.

We want to touch the soul of our customers, we want to arouse sensations and emotions, we want to convey excellence and pass a genuine state of mind bringing the best we do, unique design, setting trends in natural ways.

Be assured of excellence in every detail of each component. Our quality is only achieved by combining the knowledge of artisans with bold and talented creativity.

The most prestigious materials such as brass, marbles, crystals, velvet and leathers are carefully handled. The artisan techniques like: lacquering, application of leaf and metal work, reflect all the attention and excellence we put into every detail.

The result is a fusion of the refined art of custom and detailed manufacturing with design.

The Crete team's vision is to be a reference in the world of Design, doing something magical, notorious and unique through the beauty and exclusivity of our pieces.

A carefully chosen selection of luxury products, each with its own unique identity. Each item embodies the essence of each concept. The pieces are meticulously designed and created by our designers, with the constant ambition for excellence, exclusivity and inspiration.

At the heart of it all is the freedom of the creative process, the ability to generate through ingenious combinations, timeless ideas born of endless research, which, thanks to variety and customization, anticipate trends and meet the expectations and demanding demands of the market and unique design world. The way we feel is significant, and in collections it is explored by blending and mixture the world of design excellence, pushing boundaries and challenging ourselves day after day, challenge after challenge, exploring and embracing the unknown as a way of making art. All production of our brand reflects this philosophy and ensures strict and precise control of the various steps.

Raw materials and components are carefully selected because the constant pursuit of quality and customer satisfaction is the foundation of Crete's philosophy. We pursue in each piece to achieve the uniqueness and balance of the harmony of exclusivity, shapes and concepts, capable of creating the best solutions for exclusive ambiances, but at same time cozy environments that express elegance, luxury and convey the feeling of authenticity in each piece and in each detail.

The brand name, Crete, comes from the name of one of the islands of Greece. Not only because it is closely linked to art and architecture, but also because it was one of the origins of civilization being a source and reference of something magnificent inspiring and remarkable.

## Crete Collections

### 1. Intercontinental

The collection where the first concepts of the brand were born and where we are inspired by a selection of some specific and historic places, from the historical, artistic and cultural point of view, where through each chosen place we recreate art, we create something with a strong inspiration in elements that define each place.

This collection was born from the free and imaginative interpretation of cities such as:

PORTO: from the metal structure of the bridges to the tile in the churches;  
ROME: Inspired by the columns and our interpretation of moving art, as if the slits were in liquid state melting;  
ST PETERSBURG: where the domes mark the image;  
LOS ANGELES: most usual and modern forms;  
SYDNEY: with inspiration on organic shapes of Opera House with a surface like a sheet in the air;  
BARCELONA: with Salvador Dali's unique and twisting forms expressing color and life;  
PARIS: a city of supreme refinement, represented in the details  
ABU DHABI: as a source of inspiration in twisting forms that defy the so-called normal concepts;  
BERLIN: as a mixture of classic art with modern art;

Each piece that was developed based on one of these places was designed with freedom of thought and stroke to bring to our admirers a piece of these places wrapped in feelings and sensations transformed into works of art in the form of furniture.

### 2. Elements

The collection that most explores new forms, the craziest of inspirations, the one that most inspiring and challenging the common.

Through various concepts such as water, soul, stars, moon and constellations, the pieces communicate with us as if they expressed a feeling, a reason for existing and as if they wanted to tell something.

### 3. Minimal

Created with the intention of recreating contemporary, avant-garde and modern pieces, but always with the brand DNA.

With this collection we want to represent the avant-garde, through subtle, contemporary and elegant lines, which express in small details the delicacy of modernist forms and concepts.

### 4. Melted

This collection is intended to represent something that is no longer shaped and where it is possible to recreate and create a form, as if everything were reborn, flourished and eternal.

The Melted collection represents the purest recreation of the deconstruction of forms to create new striking and inspiring expressive forms. Created and inspired through the natural power of magma creation.

## CEO Considerations

The Crete concept is precisely the research of the origin of all and all things.

We want and fight every moment to create our history, with our values being inspired by the greatest examples of humanity, learning and exploring every day and every step, creating like this new concepts, incomparable pieces of art combined with excellence in production quality. .

I as a designer through each detail seek to perceive, explore and recreate in order to create something new and inspiring, something that touches us that arouse sensations, emotions and feelings but at same time fill us and touch us in the soul.

My biggest intention is with our pieces make a genuine impact on our customers, our followers and our designers lovers, something that wakes them up, moves them, makes them feel something completely different and realizes that we are something more what a brand of luxury furniture.

### General Clean and Care

Brass: with dry cloth

Marble: with neutral product

Glass: with appropriate cleaning product

Mirror: with appropriate cleaning product

Wood: with appropriate cleaning product

Fabric: with adhesive roll cleaner.

Leather: with dry cloth

Synthetic: with dry cloth

Tile: with dry cloth

Stainless steel: with appropriate cleaning product

Cooper: with appropriate cleaning product

Resin: with neutral product

Gold, Silver and Cooper leaf: with dry cloth

General instructions about pieces and materials

### Brass:

The brass used in our standards pieces is not suitable for outdoor use, so we strongly advise against using it for this purpose. If you want a brass for outdoor use, we have to use another type of brass or another finish.

Brass is a porous natural metal so one of its main features is its oxidation.

The brass sheet oxidizes by the solder zone characterized by being lighter color or silver; the casting brass oxidizes by the the black pores that are present in pieces and their will always be different even between equal pieces: the bar brass as the sheet brass oxidizes by the solder zones.

The oxidation of brass will depend on the purity of the material as it is a copper and zinc alloy. The brass parts oxidize faster the bigger were the piece.

Parts such as handles may never oxidize or oxidize after a short time, but these due to their small size are easy to replace if the customer so wishes not to assume Crete this cost.

Oversized parts, as measured by solder and/or pores may oxidize in 1 year or 1 month depending on their location in the customer's home. Sometimes the worst situation in brass is a few days uncontrolled humidity transport of moisture that causes oxidation.

Although most people see oxidation as a defect as the color of the piece changes, oxidation is normal and is the characteristic that gives it a certain character as it shows its personality.

We try to combat the oxidation of brass with the purest possible metal alloys and with extra varnish layers.

In packaging we also try to prevent the oxidation of brass by using aluminized film and silica bags in larger or smaller quantity depending on the size of the piece.

### Marble:

The marble is a natural stone of human extraction, so those do not exist two exactly the same stones, we can have two equals pieces with different visual appearance.

Stones that are not subject to erosion should always maintain their state in perfect condition.

Clear marbles with high temperatures can stain, pay attention to products such as: water, coffee, wine, sodas and oils/fats.

The stones may lose their shine if non-neutral materials are used for cleaning.

### Fabric, Leathers and Synthetics:

These materials are resistant and of good quality but those used in the standard pieces do not contain any technical finishing, so if the customer wishes we can provide solutions for special treatments such as: fireproof, antibacterial, waterproof, etc.

### Copper:

Copper is a pure alloy because it is an element of nature but has the same oxidation characteristics as brass.

### Tile:

Very sensitive pieces painted by hand and very fragile.

Pay attention to shock with other materials as they may break.

Because they are produced manually and be cooked by hand one of its characteristics is present some of pigmentation difference situations and texture within the same pattern.

### Lacquer:

Two pieces maked at same time need to have the exactly same color, but two pieces maked in different times are going to have a different color once the moisture is going to be different.

The difference in ink color in two different batches is due to the chemical proportions of the pigments. A minimal unmeasurable difference will give a different color.

### Fabric:

The fabric will have the same problems in color like the lacquer.

The differences in fabric are the same of the in lacquer, but in fabric we have a lot of more variables, like process of dyeing ant temperature of process.

### Hammered Brass, stainless steel and cooper:

In this cases, once the hammered is made by hand the pieces will not be always with same aspect.

Two pieces made at same time will always have a different aspect.

## PARISIAN PEDESTAL TABLE

INTERCONTINENTAL COLLECTION | RETAIL PRICE . 6 900 €

We want to present this pedestal table, inspired by the sublime forms and concepts that characterize Paris. We want elegance and sophistication; we want to provide you with an elegant piece with sublime simplicity. The Essence of Origin

## ARC CONSOLE

ELEMENTS COLLECTION | RETAIL PRICE . 12 750€

Arc console was inspired by the repeating effect of the mirrors. Due to the concave shape of the brass structure and the union of arcs on arcs, it allows creating thus the effect of repetition of reflections and lights. A sleek and modern console but at the same time intriguing by its discreet shapes. There is also the possibility of choosing the number of arcs. Consisting of a lacquered wood structure with a brass plate. You can combine several finishes both copper and stainless steel or lacquered finishing.

The Essence of Origin

## PARISIAN CONSOLE

INTERCONTINENTAL COLLECTION | RETAIL PRICE . 12 935€

The "City of Lights" needed to be honored with a functional design, but also with true beauty that will awaken its interiors. Its delicately and meticulous crafted forms over the centuries have inspired us to create a console where we have assembled a Paris-style design, an inspiring city. The Parisian forms present in its majestic streets inspired us in the development of a delicate, sophisticated and modern console but at the same time preserving its traditional forms, from the two columns that twist at the top, the upper structure constituted by three drawers veneered in leaf of walnut root with a slight touch of translucency, to the lion head shaped knobs. This console will remind us that "la vie est belle".

The Essence of Origin

## BARCELONA CENTER TABLE

INTERCONTINENTAL COLLECTION | RETAIL PRICE . 15 725€

The work of Antonio Gaudi inspired us to create an organic coffee table for this collection. The beautiful capital of Catalonia has the perfect combination of modernists. Architecture and lively life, and both elements cohabit on our coffee table. This coffee table expresses the freedom of organic shapes that mold to a strong concept. Combined with a brass structure, half in polished brass and the other half in mosaic with a glass top in stained glass that provides an exuberant and bold piece. You can combine among other materials such as copper, stainless steel or lacquer. A piece of great expression of art and design providing modern and contemporary shapes.

## INTERSTELLAR CENTER TABLE

ELEMENTS COLLECTION | RETAIL PRICE . 12 950€

Interstellar center table combines the star concept with the luxurious sophistication. Inspired by the cosmos, this piece aims to create dynamics in its surrounding environment. With a half ball brass polished in the center, which refers to the sun to a central star, this piece contains around the structure 12 forms of signs represented in polished brass, in an elegant and subtle way making an extraordinary and unique piece. By having this half sphere in the center, the visual effect shows and gives the idea that it is pulling us in as if it were a gravitational force. An absolutely fascinating piece.

The Essence of Origin

## ROME SIDE TABLE

INTERCONTINENTAL COLLECTION | RETAIL PRICE . 4 950€

Rome side table inspired by the columns reveals a fascinating and exclusive piece using materials that provide an unparalleled elegance. At the top consists of black or white marble and lacquered with a structure that can be combined with various colors. As it deals with ancient columns we wanted to demonstrate this with cracks in brass making thus a fascinating piece, with a unique touch, we wanted to react to the broken shape, using polished brass. You can choose copper or stainless steel. An exceptional side table that shows how elegance is exemplified indiscreet simplicity.

The Essence of Origin

## ABU DHABI CHAIR

INTERCONTINENTAL COLLECTION | RETAIL PRICE . 7 350€

Abu Dhabi chair shows by its forms the elegance and the supremacy of the balance of forms. A union of the contemporary concept as modern, presents a result of an incomparable and timeless chair, with unique characteristics. It has soft curves for a more modern and sculptural appeal but at the same time functional. Abu Dhabi reflects a distinctive design. Its noble design features notorious lines and a unique design through unusual shapes. Made by foundry this chair creates the feeling of being suspended, with the front legs leaning on the seat, but the back legs do not touch in the seat, thus allowing the notion of suspension. In turn, there is a structure that joins the two rear legs, making another connection to the seat in the middle part but under the seat. You can combine various finishes with numerous fabrics. The Crete team works to give you a unique experience of a piece with exclusive value and meaning.
